## 1. What is a “*One-Stop-Shop*” and the benefits of its creation in EU Member States

According to the most recent estimates, the population of third-country nationals residing in European Union countries is around 18.5 million, corresponding to 3.8% of the total population.

The management of the integration of immigrants in the European Union is one of the most challenging responsibilities that most Member States are facing today.

Both countries with longer histories of immigration and countries that are experiencing immigration flows for the first time are being confronted with the need to define sustainable integration policies.

## 1. What is a “*One-Stop-Shop*” and the benefits of its creation in EU Member States

Different Member States share many **common difficulties that compromise the consist integration of immigrants:**

- the range of institutions involved in the integration process
- the lack of coordination between Government services and their dispersed locations
- the diversity of procedures
- complex bureaucracy
- communication difficulties as a result of cultural and linguistic diversity
- difficulties of immigrants participation in decision-making of integration policy

## 1. What is a “*One-Stop-Shop*” and the benefits of its creation in EU Member States?

EU documents concur in recommending a coherent, whole-of-government approach to integration, working in partnership with immigrant communities

Integration is seen as a process of mutual accommodation, where the receiving society as well as the immigrants take part in the adaptation required

*Common Agenda for Integration* (COM (2005) 389 final) proposes concrete measures and encourages Member States to strengthen their efforts in developing integration strategies

## What is a “One-Stop-Shop”?

The One-Stop-Shop approach was recommended by the Commission’s Common Agenda for Integration to strengthen the implementation of the sixth Common Basic Principle on Integration regarding access for immigrants to institutions (stimulating partnership between public and private institutions in order to promote integrated responses ALSO involving cultural mediators from civil society institutions and developing intercultural competences of service providers)

The Portuguese experience with this innovative One-Stop-Shop strategy - official name *National Immigrant Support Centres* -, created in 2004, was considered as an example for this project. Following the philosophy of working with partners, in a context of shared responsibility, the centres involve branches of 6 Ministries and other specialized offices that provide specific support.

## What is a “One-Stop-Shop”?

**One-Stop-Shop** bring together under the same roof a number of services related to immigration (both Government and non-Government services)

**One-Stop-Shop** service meets the two-way challenge of integration in a sensible and flexible way, where the receiving society actively engages in adaptation

**One-Stop-Shop** approach is presented as an ambitious and yet realistic proposal for providing services to immigrants, improving integration and providing more and better information on the rights and duties of immigrants in EU Member States

## What is a “One-Stop-Shop” ?

**One-Stop-Shop service is a holistic strategy of mainstreaming the provision of immigration services**

**One-Stop-Shop service strength the links between civil society and public authorities and central Government**

**One-Stop-Shop plays an important role in increasing immigrants’ trust in public administration services, narrowing the gap between the two**

# ***Handbook on How to Implement a One-Stop-Shop for Immigrant Integration***

## **Implementing a One-Stop-Shop:**

- Diagnostic Report with a cost-benefit analysis concerning the creation of the OSS;
- Identification of the Government services and of the specific support services that will be available at the OSS;
- Defining coordination among State agencies;
- Identifying or creating the umbrella organisation that will manage the OSS overall and coordinate the subsequent implementation steps;
- Development of a consultative body with all of the potential agencies and civil society organisations to be involved in service and information provision at the OSS;
- Identification of an appropriate building in an accessible location in a city with high density of immigrant population;
- Negotiating partnership with immigrant associations and other civil society organisations;
- Employment and training of cultural mediators;
- Where necessary, training staff of government agencies to work at the OSS;
- Continues evaluation of all services and of the service as a whole, adaptation or expansion of services accordingly, and introduction of new services

# ***Handbook on How to Implement a One-Stop-Shop for Immigrant Integration***

## **Prerequisites for implementing a One-Stop-Shop:**

### **(1) Partnership and Coordination in integration services**

- Coordination among Government services: OSS approach brings with it a number of benefits in terms of cost, efficiency and customer satisfaction for the Government agencies involved, resolving the problems that frequently arise from dispersal of services, lack of information-sharing procedures and lack of coordination of services
- Partnership between Government and civil society: immigrant communities in the provision of services at the OSS should be assured by (a) cultural mediators, (b) participation in the consultative body and (c) participation in support offices that are created as complementary to all the Governmental services

### **(2) Mediation services by immigrant communities**

- facilitating communication between agency staff and users of different cultural origins;
- assisting users in their relations with public and private services and respective staff;
- training working teams on intercultural approaches
- the recruitment: the representativeness of the team of cultural mediators working at the OSS

# *Handbook on How to Implement a One-Stop-Shop for Immigrant Integration*

## Prerequisites for implementing a One-Stop-Shop:

### (3) Accessibility

- structural accessibility: location and considering governance style
- accessibility of services and information: shared IT / publicity campaigns, outreach approaches, virtual OSS, touchscreen OSS information points

### (4) Economic and Public finances aspects

- human resources
- material resources

### (5) Services provided

- Government services
- support services
- complementary services

# ***Handbook on How to Implement a One-Stop-Shop for Immigrant Integration***

## **The benefits of the creation of a One-Stop-Shop**

- (1) service dispersion is one of the reasons why immigrants have a lack of information concerning their rights, duties and necessary procedures – **OSS combat lack of information;**
- (2) **Working in cooperation minimises inaccuracy and time-consuming *modus operandi* in implementing procedures;**
- (3) By reducing contradictory and insufficient information, the OSS plays an important role in **increasing immigrants' trust in public administration services, narrowing the gap between the two;**
- (4) **Contributes to improving efficiency in coordinating different actions both access to services and the outcomes of procedures;**

# The One-Stop-Shop Approach

ACIDI, I.P. (Portugal)

## Possible challenges in the creation of a One-Stop-Shop:

### (1) target vs. mainstreaming service provision

- the overall long-term goal of the approach is mainstreaming immigrants' use of public administration services;
- by 'mainstreaming' in the OSS approach it is implied that immigrant integration service provision is a cross-cutting effort that engages both Government and non-Governmental actors;
- OSS is recommended as a useful mainstream and outreach tool for immigrant integration and access to public services;

### (2) immigration experience and immigrant population composition

### (3) National/Regional/Local: centrally governed states, federal states...

acidi

Alto Comissariado para a Imigração e Diálogo Intercultural, I. P.

# The One-Stop-Shop Approach

ACIDI, I.P. (Portugal)

## Possible challenges in the creation of a One-Stop-Shop:

### (4) Partnership with civil society

– immigrants' participation in policies that directly affect them increases their sense of co-responsibility and of belonging, promoting active exercising of rights and duties;

### (5) Coordination between Government services and financing the One-Stop-Shop

– while OSS implementation requires the supervision of one umbrella agency, each ministry or agency with a branch present at the OSS retains its competences and does not delegate these to the umbrella organization;

- the implementation of all aspects of the OSS may not be immediate but rather a gradual process of negotiation and accommodation of the views of all those involved;

### (6) One-Stop-Shop accessibility
