

# Labour Migration from the Global Perspective

Bernd Hemingway

Regional Director for EEA, EU and NATO

August 2013

# Future demand for migrant labour

- Global labour market forecasts
- Increasing geographic diversification of the global economy
- Evolution of the demographic trends
- Skill dimension of migration

# Perspectives of countries of origin

- Key policy directions
- Which migrants need support?
- Brain circulation and diaspora policies
- Migration and development?
- Perspectives of migrants vs perspectives of states

# Perspectives of countries of destination

- Ensuring that labour migration on one's territory is legal and safe
  - Open channels in line with labour market needs
  - Transparent and clear immigration procedures
  - Operational tools to enable legal and safe foreign recruitment

# Perspectives of countries of destination

- Bi- and multilateral cooperation, including:
  - Labour market analysis and compatibility of data
  - Strengthening labour market and educational institutions
  - Improving compatibility of occupational profiles and recognition of qualifications
  - Portability of social security
  - Lowering costs of remittances
  - Academic exchange programmes

# Perspectives of countries of destination

- Integration
- **Open, dynamic and inclusive societies**
